

NET UX Series (Not For Resale) Promotion

All-In-One Survivable Branch Appliance (SBA) for Microsoft Lync Server 2010

SPECIAL Offer for Microsoft Voice Partners:

UX1000 lab units for a discounted price and we'll help you set it up!

NET's offering our Channel Partners an opportunity to purchase up to 2 NFR UX1000 nodes for Microsoft Lync deployments at a discount - a discounted worldwide price for UX1K-AMN-2PRI-4FXS-NFR and UX1K-2PRI-4FXS-NFR - during the limited promotional period. An additional unit can be purchased at the same discounted price in the following year for partner's lab use only (not for production use). This program is intended to help our partners gain hands on experience with the UX1000's features and functionality, increase sales, and aid in the provision of first-tier support to their end users.

NET's Unified Exchange 1000 Series (UX1000) is a modular multi-function, single-box appliance that delivers cost savings, reduces management complexity, and increases reliability for branch office networking and communications needs.

In addition to the hardware bundles mentioned above, the NFR includes the following part numbers at \$0 cost to the partner (Partners please add these parts to the quote because they're not automatically added):

1. UX-FORKING (call forking application)
2. UX-REST-API (REST API license)
3. UX-SIP-25 (25 SBC sessions)
4. UX1K-ASM-SBA-SW

Offers Includes:

- UX1000 without SBA, 2PRI and 4FXS ports for a discounted price
- UX1000 with SBA, 2PRI and 4FXS ports for a discounted price

To see the pricing go to the Unity Systems portal www.unitysystems.com.au and select NET. In the SKU/DESC enter NFR, or contact your Unity Systems Channel Account Manager.

* Please note this is subject to FX rate for the AUD value.

** Offer good now thru December 31, 2012 or while supplies last. Limit two per Partner. Products received pursuant to this offer are not for resale (NFR) and are to be used only for the limited purpose of testing, training, evaluation, and/or demonstration.

*** Pre-sales consultation and installation done by NET service organisation.

UX Series is ideally suited for remote sites, such as branch offices, with minimal IT support.

UX Series Survivable Branch Appliance (SBA) - Purpose-Built for Microsoft Lync and next-generation communications NET's Unified Exchange (UX) Series are modular multi-function, single box appliances that delivers cost savings, reduces management complexity, and increases reliability for branch office networking and communications needs.
